INTEGRA TELECOM UNVEILS ONLINE DATA STORAGE FOR BUSINESSES

Internet Solution Supports Growing Businesses with File Storage and Protection

Portland, Ore. – Feb. 17, 2010 – [Integra Telecom Inc.](#), an integrated communications provider for business, has released a new online data storage product intended to help growing businesses accommodate for increasing data storage needs. Integra's Online Data Storage utilizes File Transfer Protocol (FTP) technology, enabling customers to upload files to Integra's secure data centers where the information is backed-up every four hours. The offsite data protection safeguards critical business information as well as providing secure, password protected, remote access to files from any Internet connection.

"We're pleased to be able to offer Online Data Storage to our customers. This service complements our other broadband data service offerings and is a direct response to the needs expressed by Integra's business customers," said [Trent Anderson, vice president of product marketing for Integra Telecom](#). "Combined with Integra's locally based customer service representatives and technicians, Online Data Storage provides a level of security and convenience businesses are comfortable relying on."

Integra's Online Data Storage product also offers customers file restoration with 30-day storage history, and live, local customer support 24 hours a day. Additionally, customers enjoy secure and remote access from anywhere they're able to access the Internet. Online Data Storage is
