

# ONLINE DATA STORAGE

INTERNET SERVICES

## Safe, Simple and Secure.

Integra understands that as your business grows so does your need for secure data storage. Day to day operations don't always allow time to think about hard drive crashes, virus attacks, or the fact that your server is running low on space. Now you can safeguard your crucial business information with Online Data Storage from Integra.

Online Data Storage is designed to support the growing need for file storage and protection for business of all sizes. By using simple File Transfer Protocol (FTP), you can easily upload your files to Integra's secure data centers where they are backed-up every four hours, nightly, and weekly. This provides valuable off-site protection as well as remote access to your files. No matter what the situation you can access your files from any PC anywhere with your secure login name and password.

## Powerful Protection for Peace of Mind

Integra's Online Data Service is designed for business-class performance.

> **Enhanced Storage**

Your data is stored in Integra's Portland, Oregon data center with back-ups to Minneapolis, Minnesota every two hours.

> **Easy of Use**

Drag and drop capability allows easy transfer of files.

> **Automated Back-up With Third Party Software**

Search the web and find free third party FTP software that allows you to create automated file transfers at set intervals.

> **Effortless File Restoration**

Delete a file and realize you need it back? No problem, your storage history goes back 30 days.

> **Remote Access**

Once transferred, your files are now accessible from any PC in any location – home, remote office, anywhere with a web connection.

> **Superior Security**

You can encrypt your files prior to transfer for the utmost in secure off-site storage of your sensitive data.

> **Local 24x7 Support**

When you have a question, our local customer and technical support teams will answer your call - **live**.
