

## COLLABORATION & MESSAGING SERVICES

# MICROSOFT<sup>®</sup> EXCHANGE WITH HOSTED BLACKBERRY<sup>®</sup> SYNC

### DESIGNED FOR YOUR ON-THE-MOVE BUSINESS.

Microsoft<sup>®</sup> Exchange with hosted BlackBerry<sup>®</sup> Sync is for small and medium-sized businesses on the go. This hosted solution provides all the benefits of mobile access to information without the time, cost and staff required to manage an email system or wireless solution on your own.

BlackBerry Sync is server software hosted and managed for you by Integra. Take advantage of the full productivity of an enterprise BlackBerry solution, with no need for internal IT resources or support. Stay connected to people and information anywhere, anytime, using BlackBerry smartphones — with secure, wireless access to email, calendars, contacts, business data, Internet and more.

Choosing hosted Microsoft Exchange with BlackBerry Sync allows for predictable and reliable spending, too. Pay no upfront fees for server hardware or software installation, and no on-going IT maintenance and support costs.

BlackBerry Sync is a subscription service with a monthly fee for each BlackBerry user. Only pay for what you use.

### FULL BLACKBERRY WIRELESS MOBILITY. NO COMPROMISES.

Being small doesn't have to mean acting small.

With Integra's hosted Microsoft Exchange and BlackBerry Sync service, your business enjoys the same functionality and productivity capabilities as major enterprises. In fact, your bigger competitors may envy your flexibility and agility. You don't have to manage a thing — it's all managed for you behind the scenes.

## EASY TO PURCHASE. EASY TO USE.

BlackBerry Sync is available as an add-on feature to your hosted Microsoft Exchange account. Integra takes care of the management and administration. There's no installation or work required to get started, so your organization can be up and running with BlackBerry wireless mobility right away. And getting to know your BlackBerry smartphone won't take long, either. Their intuitive interface allows new users to become expert users quickly.

## SAFE. SECURE. RELIABLE.

**When it comes to protecting your confidential information, BlackBerry solutions are celebrated for ensuring world-class data security and reliability:**

- » BlackBerry Sync provides the full suite of advanced security features and IT policies that come with self-managed BlackBerry software, including Triple Data Encryption Standard (DES) or Advanced Encryption Standard (AES) encryption, the first publicly accessible and open algorithm approved by the National Security Agency (NSA) for top secret information. Your information stays protected and confidential.
- » All wirelessly sent and received information comes and goes through hosted BlackBerry software and our highly secure hosted Microsoft Exchange environment. It's safe and secure from start to finish.
- » If a BlackBerry smartphone is lost or stolen, it can be locked down or erased immediately. Your information stays safe.
