

COLLABORATION & MESSAGING SERVICES

MICROSOFT® SHAREPOINT™ 2010

A LAUNCH PLATFORM FOR POWERFUL PRODUCTIVITY.

Microsoft® SharePoint™ 2010 from Integra Telecom makes it easier for people to work together. Sharepoint 2010 is an affordable, flexible, customizable enterprise-class content management and collaboration platform. SharePoint™ stores all your content and allows you to securely access and utilize that content to collaborate, visualize problems and solutions together, and gain extraordinary insights.

Using the cloud-based SharePoint™ 2010, you can centrally store, share and update information over the Web. Use it to easily set up web sites and discussion forums, manage documents from start to finish, run blogs and publish forms and reports to help everyone make better decisions.

SharePoint™ 2010 is not just one solution. It's a platform for many solutions, all of them taking your company information and turning it into shared intelligence.

SPUR COLLABORATION IN AND OUT OF THE COMPANY.

SharePoint™ 2010 is designed to increase productivity, especially for small and mid-size businesses. Use it to create document storehouses that increase collaboration inside the company—as well as between you and your partners, vendors and customers. Your employees—or the third parties to whom you authorize access—can securely share documents, calendars, contacts, links, ideas and more. No wasting time exchanging emails and waiting for responses. SharePoint™ 2010 is real-time collaboration, full-time.

A NEW ENGINE TO DRIVE YOUR INTERNET.

When integrated with hosted Microsoft® Exchange, SharePoint™ 2010 can also provide an instant, powerful corporate intranet.

STORE DOCUMENTS ONLINE

Everyone works off a single, centrally stored version of all documents, which can be easily opened using a hyperlink.

PROTECT FILES

Lock documents while they are being edited, so no one can overwrite the work of others.

RUN BLOGS AND WIKIS

Don't just keep your staff in the loop – make them a part of it. Blogs allow employees to share their expertise and stimulate conversations. And wikis are collaborative web sites that gather the collective work of many company authors.

MANAGE PROJECTS

Create project-specific web sites, using built-in task list, calendar and document collaboration features to organize a team around specific tasks and deadlines.

CONTENT MANAGEMENT, COLLABORATION SIX KEY CAPABILITIES.

SITES SharePoint 2010™ is a massive web site engine that makes creating web sites easy. Share documents with colleagues, manage projects with partners and publish information to customers.

COMMUNITIES Collaboration is built in, so you can easily share ideas and work together the way you want.

CONTENT SharePoint 2010™ has a massive, smart search engine built in to cut through the clutter. A unique combination of relevance, refinement and social cues helps you find the information and contacts you need to get the job done.

SEARCH SharePoint 2010™ makes content management easy. Set up compliance measures “behind the curtain” and then let people continue to work naturally with the applications they like.

INSIGHTS SharePoint 2010™ helps you bring all your information together, understand it better and visualize it in tools such as dashboards and scorecards. Make faster, better decisions. And help others understand why.

COMPOSITES SharePoint 2010™ is meant to be extended and customized. Use tools and components to create do-it-yourself business solutions. Build no-code solutions to rapidly respond to business needs.

NEW AND IMPROVED FEATURES IN SHAREPOINT™ 2010

EXPANDED BROWSER SUPPORT	Runs smoothly on Internet Explorer® 7 and 8, as well as Firefox® and Safari® web browsers.
IMPROVED SEARCH	Optimizes search capabilities, providing more relevant results and a more interactive search experience.
LIST ENHANCEMENTS	Improves user experience with large lists.
MOBILE DEVICE ENHANCEMENTS	Expands access to various pages, lists and functionality from any smart device.
WORKFLOW ENHANCEMENTS	Improves and expands options to build automated workflows that can accommodate complex business scenarios.
IMPROVED USER INTERFACE	Includes the SharePoint Ribbon interface, integration with Microsoft Office, drag-and-drop capabilities, and enhanced social media capabilities.
CUSTOMIZABLE TEMPLATES	Upload and use custom/third-party templates.
VISIO® SERVICES	View and share Visio diagrams directly in SharePoint Foundation 2010. SharePoint Foundation 2010 provides a web-based collaboration platform to quickly create many types of sites where you can collaborate on web pages, documents, lists, calendars and data.
