

# SECURE SOLUTIONS FOR K-12 SCHOOLS

## KEEPING STUDENTS AND SCHOOLS SAFE AND CONNECTED

### Technology Drives Change

K-12 Education enters the digital age, fueled by developments in technology that offer new pathways to learning. Students, parents, and teachers now expect access to high speed Internet, online courses, and other digital tools as fundamental components of a modern education.

These advancements open up countless new opportunities for students and educators. They also create new requirements and demands that schools and districts are challenged to meet.

Technologies must be funded, implemented, and managed—all while ensuring the safety and security of students and their personal information every step along the way.

### A Partnership that Keeps Pace

Integra delivers solutions addressing a wide range of K-12 educational needs. Our experienced, local Education Account team is here to help you review your current systems, identify areas of opportunity for improvement, and define a technology roadmap that meets your requirements today, and tomorrow.

From secure voice and networking solutions, to student Internet and data safety, to capacity planning and management—we've got the right solution for your organizational needs.

### ORGANIZATIONAL BENEFITS

- + **Prepare** for next generation distance learning technologies
- + **Adapt** network security to personal technology devices
- + **Manage** fluctuating bandwidth requirements for applications and data
- + **Protect** students from harmful people and materials with internet safety measures
- + **Safeguard** personal information from unauthorized outside access
- + **Ensure** network availability in emergencies, keeping students safe
- + **Provide** flexible and cost effective voice services for students and faculty

## Powering Innovation with Big Bandwidth

Integra's robust fiber-optic network offers you a reliable, secure and scalable solution to:

- **Support next generation distance learning technologies** – Data Networking & Internet Services provide the bandwidth you require to support high-definition video-conferencing, e-learning, collaboration tools, and Google Apps.
- **Embrace Bring Your Own Device (BYOD), without compromising security or bandwidth** – Our managed Cloud Firewall Service and Data Networking & Internet Services give you the capacity and control you need to effectively and efficiently support BYOD initiatives.
- **Manage fluctuating bandwidth requirements and reduce costs** – Integra provides flexible solutions allowing traffic to be converged onto a single connection or Virtual Private Network (VPN)—maximizing your investment.

## Creating a Safe Learning Environment

Educators leveraging technology to improve learning must also protect students from harmful online material, keep their personal information safe, and maintain connectivity in case of emergency.

Integra's solutions for education are built with security in mind. Our reliable voice, data networking and Internet services are designed to help you:

- **Protect students from harmful materials** – Integra's Cloud Firewall Service (CFS) can be configured to filter and block categories of content, protecting kids from accessing inappropriate content.
- **Keep students' personal information safe** – CFS helps schools stay in compliance with the Child Internet Protection Act (CIPA), with vigilant technology protection measures designed to thwart malware attacks on your network.
- **Stay connected in the event of an emergency** – Integra offers secure Voice and Data Services, with defined Service Level Agreements (SLAs), delivered over diverse, fully-redundant routes—ensuring availability during a crisis.

Integra has participated in the Federally-funded E-rate program from its inception, offering discounted products and services to eligible K-12 schools, districts and libraries.

Contact us today to learn more about how Integra can partner with you to keep your students and school safely and affordably connected.

### ABOUT INTEGRA

Integra is one of the largest facilities-based providers of communication and networking services in the western United States. We connect businesses of all sizes with advanced technology solutions in 35 metropolitan markets. Integra owns and operates an enterprise-class network consisting of a 5,000-mile long-haul fiber-optic network, 3,000-miles of metropolitan fiber and a nationwide IP/MPLS network.
